

TIME FOR PASSION

PRESS RELEASE

THE NEW GVA'4

The new «GVA'4» by Yeslam has a beautiful and technical appeal with its skeleton dial letting appear the double barrel and the visible balance.

The overall look and feel has contrasted polished and rough anthracite areas that gives it a strong spirit. The GVA'4 is part of the GVA collection characterized by the titanium case, the «Aviator» style hands and the nubuck strap. The lightness of the titanium case combined with the skeleton movement makes the watch very light for users. Titanium is stronger and lighter than steel and resistant to salt water corrosion.

The watch features a double-barrel which allows for extra long 5 days power reserve (120 hours). Through the skeleton case back the balance wheel signed «Yeslam» oscillates, dividing time into equal segments. This is the regulating mechanism that controls the watch's timekeeping accuracy. In opposition with the movement technicity the vintage nubuck strap brings a the soft and cool touch.

Full of contrasts yet harmoniously designed the Yeslam GVA'4 will be your travel and leisure favorite timepiece.
