

## AVIATOR III MACH SPEED CALCULATOR & ALARM, SWISS MADE

**At the crossroads of two worlds, the world of aviation and the world of watchmaking, Yeslam is proud to present his latest product, the Aviator III, a watch «For and by a pilot».**

The speciality of the Aviator III is the ability to calculate the speed of a moving object relative to the speed of sound (MACH). This gives the owner the sensation and imagination that comes with the world of aviation through the world of watchmaking.

Among many other specifications, this Swiss manufactured watch is using the finest materials in the watch industry:

- Automatic alarm movement with second time zone
- Rotating cobalt bezel, one of the hardest materials and first in the industry
- Titanium case for durability and lightness
- Calfskin leather strap with stylish perforations for a perfect aviator look.

Moreover the mechanical movement of this watch has an automatic winding with an alarm function and a second time zone, necessary for people that travel the world.

With this new Aviator model, Yeslam presents ingenuity in joining via this timepiece and a flight instrument these two worlds, so different yet so similar in both precision and excellence.
